(54) Title: **VEHICLE CARGO MANAGEMENT SYSTEM**

(57) Abstract: A cargo management system of this invention includes a deep well storage area (25) beneath a cargo floor, which well may be horizontally and/or vertically divided and which preferably includes a plurality of doors (35,38) to access the well. In the illustrated embodiment, the management system also includes a panel which may be placed into three positions: a first storage position in which the panel (16) is flush against the back of the rear seat (15); a second shelf position in which the panel (16) is horizontal and spaced from the cargo floor by a first distance; and a third privacy shield position in which the panel is also horizontal but is spaced from the cargo floor a second distance, the second distance exceeding the first distance.

## A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 B60R7/02 B60R5/04

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 B60R

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

## \* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*Z\* document member of the same patent family
